Galicia Sustainable Destiny

Leave a mark on your soul, not on the Earth

Galicia

A historic land where nature meets tradition on the Atlantic coast of Spain.

Galicia Sustainable Destiny is a product club initiative of the Cluster Turismo de Galicia, in partnership with the Xunta de Galicia (Regional Government), to respond to an increasingly growing demand and need: to make tourism a responsible activity, seeking its comprehensive sustainability from an environmental, social and economic point of view.

Sustainable tourism takes centre stage in the 2030 Agenda; its benefits are key to reaching the Sustainable Development Goals (SDGs) and can directly or indirectly contribute towards meeting these goals. Specifically, it has been included in some of the targets of “Goal 8” (Decent work and economic growth), “Goal 12” (Responsible consumption and production) and “Goal 14” (Life below water), related respectively to inclusive and sustainable economic growth, consumption and production, and the sustainable use of the oceans, seas and marine resources.

Sustainable tourism should carry out all its activities minimising, as far as possible, impact on the environment. Its basic principle is for resources to be exploited in a way that does not exceed their regenerative capacity. In other words, promoting tourism that respects the ecosystems and minimises impact both on the natural environment and local cultures, while seeking on an economic level to generate employment and income for the local population.

The **World Tourism Organization** (UNWTO) proposes three pillars on which this tourism model should be built:

1. Optimising environmental resources:

Without an ecosystem there is no tourism and, therefore, caring for the natural environment is fundamental. Only by conserving natural resources and protecting biological diversity can tourism exist.

2. Highlighting the authenticity of local culture:

A key factor in understanding a place is its people, the traditional values of the host community, its culture, its architecture, etc. Without respect for the native culture, tourism cannot be sustainable.

3. Distribution of wealth:

The economy is another key factor affecting tourism: economic activities that are sustainable over time should be encouraged, while achieving a balance in the distribution of social-economic benefits. One goal will be to create opportunities for stable employment, obtaining social services and income and reducing poverty in local communities.

A photograph of two young children with dark hair, wearing orange life jackets, looking intently at a small, dark, textured object (likely a shell or a piece of coral) held in the palm of an adult's hand. The background is a bright, sunny outdoor setting with green grass and a body of water in the distance.

+130
companies

+150
experiences

The product club uses sustainability as the backbone of the entire tourism offer, heading towards a more sustainable tourism model aligned with the Sustainable Development Goals set out in the 2030 Agenda.

Galicia Destino Sostible aims to ensure the long-term development of the destination, in addition to strengthening the sector's competitive capacity, meeting the new demands of travellers, who are increasingly concerned about the impact of their actions on the planet and climate change.

Our club is made up of four kinds of businesses: **accommodation, restaurants, travel agencies and complementary tourism companies**. We currently have more than 100 companies offering over 150 experiences. They all promote the tourism attractions in Galicia – its diversity and the beauty of its landscapes, which, added to a gastronomy renowned for its outstanding quality, are the main tourist attractions that lure visitors Galicia.

This project promotes **tourism committed** to the territory and one that **fosters social development** through the **conservation of cultural and heritage assets** linked to **promoting the local economy** while generating benefits distributed throughout the value chain.

HOTEL BELA FISTERRA

Bela Fistera is the first Literary and Eco-sustainable hotel in Galicia, located in the heart of the Camino de Santiago. Our design is based on the former fish salting factories that were once found along the Costa da Morte, and, thanks to this, we've been awarded many international architecture prizes. We are located right on Langosteira beach, which we have access to from the back of the hotel. We have 16 rooms, three with sea views. They are all dedicated to a seafaring novel from world literature, with the exception of the room "Marea viva", which is dedicated to present-day authors. Bela Fistera is, broadly described, a haven of peace on the trail, where you can experience the pleasure of the taste of culture and the sea.

ATALAIA HOTELES

Atalaia B&B is a hotel with the best services and amenities. Designed inside an old stone house, its name is a historic homage to the Atalaia Tower, which stood just a few meters away, atop the city's surrounding wall. With 10 different rooms, tastefully decorated and adapted to the property's requirements, we aim to achieve the greatest versatility in accommodations. This allows us to connect rooms, creating triples and quadruples to maintain communication without losing independence. In the attic, we've created the Mini Atalaia, an open loft that can accommodate up to 6 people. Drawing from our experience in the industry and the needs we identified as travelers ourselves, we've created this accommodation. All our rooms have individual climate control, a private bathroom with a micro-rainfall shower, LED TV, telephone, and free Wi-Fi. They are all exterior rooms with double glazing. Noble materials like wood in the carpentry, stone in the fireplaces, soft, warm, and elegant colors constitute the essence of our Atalaia. Enjoy the views of Bonaval Park from the galleries or simply watch passersby on this traditional shopping street – these are two of the pleasures we offer.

HOTEL SEMÁFORO DE BARES

The Hotel Semáforo de Bares is located in northern Galicia, in Ortegal, one of the most unspoilt coastal areas of the Iberian Peninsula. It's housed in an old military building erected in the 1920s, whose function was to communicate with ships using flag signals. It was also a military observation post and meteorological centre. It's located very close to the cape and lighthouse at Estaca de Bares, at a higher altitude, 210 m above sea level, just at the entrance to the Ría do Barqueiro. It was in use until the late 1960s. Subsequently, at the end of 1990 and the beginning of the present century, it was rehabilitated and converted into a charming nature hotel where stone and wood are combined in all the building's rooms, with living nature all around and further than the eye can see. This hotel is designed for guests to relax and unwind; therefore, only bookings for adults are permitted. It's not a hotel suited to families, and neither are pets allowed.

GRANJA LABRADA BED & HORSES

Rural complex located in a Galician village in the province of A Coruña. La Granja consists of a main stone building, for guest accommodation, and a number of wooden and stone outhouses, an equestrian area and over 10 hectares of woodland and meadows home to our horses: the life and soul of La Granja. Guests have access to all the common areas of La Granja. You can take a walk through the equestrian area, sit for a while on the porch or have a drink or a snack in ‘El Granero’, which serves as both a common room and dining room for guests. Our herd of horses live in semi-freedom in over 10 hectares of woodland and meadows. In our system, Paddock Paradise, the horses have a track surrounding their entire habitat that reaches the equestrian area, where they have a small bar (i.e. a drinking trough), so they often come up spontaneously to drink, and other times they hang around, waiting their turn to work, if they have to do any activities with humans.

TORRES DE MOREDA

Located in a natural setting 4 km from the centre of A Estrada, very near the Rías Baixas and 20 minutes from the European meeting point for pilgrimages: Santiago de Compostela. The property covers 25,000 m², and most of the land is planted with apple trees for organic cider production. Recently rehabilitated by the prestigious architect Pedro de Llano, the house conserves the beauty of traditional Galician architecture while adding new avant-garde elements.
At Torres de Moreda we have seven very comfortable double rooms, each with a personality of its own. They have each been christened with the name of an organic apple variety grown on the farm. We also have a room for persons with reduced mobility. All the rooms in our rural hotel are exterior, with full bathroom, central heating, TV and Wi-Fi. Torres de Moreda also has an apartment that sleeps four adjoining the main house. It used to be the living quarters of the former 'caseiros', the caretakers who looked after the animals and cultivated the estate's lands.

CASAS DOS CAMPO

Casas do Campo are self-contained accommodation built in stone and wood, equipped with the best services and stylish decor, which in turn creates a welcoming space in harmony with the environment. We are located in a privileged environment, the Fragas do Eume Natural Park, considered one of the best-conserved Atlantic forests in Europe and which for us, the people of Galicia, is our own Enchanted Forest. At times of death, legend has it that the Santa Compañía (Holy Company) even decides to pay us a visit to enjoy our nights drinking queimada. We love to say that when the Galician climate is kind to us we have one of the best skies to stargaze from the porches of our cabins. It may not be the Northern Lights, but it's IMPRESSIVE! You will also be able to enjoy the communal areas with pool and entertainment for kids. At Casas do Campo we respect nature and the environment and, of course, we're a pet-friendly establishment because we love animals!

RESTAURANTE CULLER DE PAU

The space is a key element in our culinary narrative: at Culler we're interpreters of our land, we try to make our guests experience the land by using products grown on it, cooking our environment so to speak. Our gastronomical journey begins in an unparalleled setting and we conceive every part of the building, the kitchen and the whole restaurant as a continuation of the space, the scenery.

The Ria de Arousa dominates the room in a minimalistic building in which the seating area, but also the kitchen and other multi-use spaces, look out from the large windows over the ria, with Ribeira on the other bank and the islets of Noro and Vionta as spatial references, all making the dining experience more enjoyable.

Natural light, wood and glass predominate in the Culler building, striving to reflect the setting, as our dishes and our menus also do. We're an extension of the sea and the land, and what we do is transfer all of this to the dishes in which taste is paramount, but, as all senses are interconnected, each one matters when it comes to eating, savouring and having fun at the table.

ECLÉCTIC RESTAURANTE

We cater for a maximum of 16 people per service; we do our own purchasing and cooking, and we finish the dishes off with a live presentation before serving. Eclectic is our home, where we define and shape the essence of our gastronomic proposals.

Our inspiration comes from our local traditions and history, taking each ingredient to the next level. We base our cooking on the product, technique, creativity, history and recognisable flavours.

We work with local, seasonal raw ingredients, in which we prioritise the circular economy, the sustainability of our urban and rural environment, taking care above all of the culture and tradition of this land. We explore the unique characteristics of the gastro-cultural history of Galicia at the hands of a historian. We believe cooking has to be based on product excellency and should go hand in hand with the culture surrounding it, which is why understanding, loving, disseminating, defending and contributing to its development is necessary.

In our kitchen we use coherent techniques adapted to our environment and contribute to disseminating and developing local culture.

BODEGAS ALTOS DE TORONA

Altos de Torona is the largest single vineyard in the Rías Baixas, with 94 south-facing hectares of enormous biodiversity on the slopes of Monte Galeno, in Tomiño-O Rosal. On this hill, overlooking the Miño River and close to the Atlantic Ocean, the vineyard is divided into plots, where mainly the Albariño grape is grown, in addition to other native Galician varieties such as Caiño Blanco, Godello, Loureira or Treixadura. This area of biodiversity is located in the Rías Baixas. More than 91 species of flora and 71 species of fauna coexist, protected under a plan for the action and conservation of this natural habitat that produces wines of an Atlantic character, of marked typicality, freshness and elegance.

BODEGAS REGINA VIARUM

Venture into inland Galicia, in the heart of the Ribeira Sacra, where the majesty of the river Sil embraces steep slopes and brings true oenological gems to life. The Bodega Regina Viarum is located in the hills of the Cañón del Sil, in a place where passion and commitment of a family dedicated to wine-making excellence is breathed. Harmoniously integrated into the environment, it offers visitors a unique experience that invites them to immerse themselves in 'heroic viticulture', a distinctive feature unique to certain parts of the world that refers to the extreme difficulty of vine cultivation. The vines arranged in steep, hand-built terraces create a unique landscape of great beauty that can be seen from our glazed terrace, the most iconic in the Ribeira Sacra.

CORISCA

We are pioneers in recovering organic agricultural practices in our Rías Baixas Protected Designation of Origin with regard to the care and conservation of our own eco-terroir, which is what makes our wine unique. Our two plots in the valley of the river Miño are surrounded by mountains and forests, which shelter us from strong winds and external contamination. Finca Muiño, a 2-hectare plot of granite soil, which improves the drainage, with vines more than 45 years old in a vine-training system. Finca Malladoura, 3 hectares on soil of granite and pebbles, with 15-year-old vines in a trellis system. All work is manual: pruning is late, and vimbio ties (typical Galician willow-type bush) are used, in addition to two green prunings. Our mission is to re-establish the microbiological life in the topsoil and ensure soil health. This is how we achieve the exclusivity and authenticity of our grapes, respecting the environment and biodiversity in the vineyard.

BODEGA MARTÍN CÓDAX

Bodegas Martín Códax was founded in 1985 taking the name of the most famous Galician troubadour, who used to sing about love and the sea of our coast. His mediaeval poems, the oldest of the Galician-Portuguese language, are still conserved with the original music. Since it was founded, Bodegas Martín Códax has always grown and flourished while supporting its people, land and culture. This is who we are and that's how we make our wines. A project based on the dream, passion and work of a group of wine-making families is now a reality that has made it possible for the Bodegas Martín Códax to become a symbol of Galician wine inside and outside our country, promoting our unique, strong identity in over 50 countries in the world.

SACRA ACTIVA

Our winery used to be a 'bodega de guarda' (where wine used to be stored after being brought from the vineyard bodega) that we have now reinvented so our customers can enjoy eating and drinking there. Founded over 300 years ago, it was abandoned for 14 years. With the help of local craftsmen. Fernando Ibarra, specialist in the ethnography of the area, we were able to restore in magnificently. The 'bodegas de guarda' were north facing to conserve the wine and, moreover, this example was semi-buried, in such a way that part of its walls are carved in the living rock of the mountain. This gives our wines humidity they need for their optimum conservation. We are in an exceptional location, 20 metres from the river Miño, in a place full of peace, with a viewpoint overlooking the river canyon, vineyards and forests, and more. We have a tasting area where you can taste our own wines or those of other winegrowers in Galicia, especially from the Ribeira Sacra. We transformed the old wooden vats into furniture and thus also created a point of sale. In our catamaran, you'll be able to discover "O Cabo do Mundo", Maiorga Island, visit the vineyards of Finca Millara or the picturesque town of Belesar, the submerged village of Portotide or also the Augacaída waterfall.

We are a 100% artisan bread bakery, with protected geographical indication, Pan de Cea, and protected geographical indication, Pan Galego.

Currently, only 11 bakeries in the world bake this bread, which was awarded Spain's first PGI in the sector and has been made in the traditional way since the 13th century. We also have the PGI Pan Galego, one of the 12 bakeries in Galicia certified in its artisanal production and the only one with double certification. We bake the bread in three stone and wood ovens.

The main floor is the bakery with ovens, troughs and wooden kneading tables, the woodshed and the bread shop. All glazed, to share the process with the visitor. On the first floor there is a circular economy system with smoke, unique in Spain. We don't use fossil fuels: only wood as a source of heat, and smoke.

We're on the Silver Route of the Camino de Santiago. Eight kilometres from the Oseira Monastery and seven from O Carballiño, pioneer of excellent octopus preparation. The region has an important thermal activity and the Protected Designation of Origin *Viño do Ribeiro*.

CHARTER TERRANOVA

At Charter Terranova we have two catamarans for private rental with a skipper and capacity for 12 people on board, perfect for an unforgettable getaway with family or friends. The founders are Carlos and Fernanda, and they have spent over 30 years sailing all around the world. Thanks to their passion for the sea, they'll not only offer you the opportunity to sail through the Rías Baixas, but they'll also make your experience unforgettable. Be original! We offer you several alternatives within our packages so that you can discover the Galician coast in the most special way possible, on board your own boat, savouring every second of the crossing. Or choose one of our catamarans and create your own custom adventure, departing from Vigo to any destination of your choice. Enjoy a real holiday at sea, with all the comforts provided by four cabins, a lounge, fully equipped kitchen and everything you need to enjoy the sea: paddle surfing, snorkelling, fishing, etc. All you have to worry about is choosing the destination, because from the moment you embark, our skipper will select unique experiences for you and your family or friends.

We're a nautical agency located in Vigo, operating in the charter business since 2000 with sailing and motor boats in the Rias Baixas of Galicia.

Because of our years of experience in professional and sport sailing all over the world, we recommend Galicia as a charter destination for several reasons: its setting, with marvellous beaches of fine white sand, classed among the best in the world and bathed by the Atlantic Ocean, the beauty of its nature and the Atlantic Islands of Galicia National Park (the islands of Cíes, Ons, Sálvora, etc.). But also because of our famous gastronomy, thanks to top quality products such as our seafood and livestock. Hundreds of people from all over the world sail with us every year, enjoying our hospitality and experience.
